**Idle free**

# THANK YOU FOR NOT IDLING

According to Argonne National Laboratory research:

- ▶ Idling uses more fuel than does restarting your car.
- ▶ Unless you're driving a clunker, your vehicle will restart.
- ▶ You will not wear out the starter.
- ▶ Idling a car wastes about 0.3 gal/h and a big truck about 1 gal/h.
- ▶ Each gallon of fuel burned emits about 20 lb. of carbon dioxide.
- ▶ In some locations, idling is illegal and can result in substantial fines.
- ▶ Idling gets you nowhere!
